*Biodiversity* N. Biedinger, Wilhelm Barthlott, Matthias Winiger, 2013-06-29 Biodiversity sometimes simply understood as diversity of species is a specific quality of life on our planet the dimensions and importance of which have just lately been fully realized Today we know that biological diversity is a global asset of incalculable value to present and future generations Kofi Annan Biodiversity is spread unequally over the world in fact the main share of biological resources worldwide is harboured predominantly by the so called developing countries in the tropics and sub tropics Therefore Biodiversity A Challenge for Development Research and Policy was chosen as the title for an international conference which was held in Bonn in 1997 as one of the first major events organized by the then newly established North South Centre for Development Research ZEF at Rheinische Friedrich Wilhelms Universität Bonn Germany Since the ZEF founded by the Senate of the University of Bonn in 1995 has played a central role in turning Bonn into a centre for international cooperation and North South dialogue The Centre is a product of the Bonn Berlin agreement of July 1994 which was adopted to offset the effects caused by the Parliament and much of the Government moving to Berlin It fits in well with the double strategy to strengthen Bonn s position as an international science arena and as an eminent place for development policy and the national and supranational agencies dealing with this issue

**The Injured Hand** Hans R. Mittelbach, 2012-12-06 A specialist in hand surgery will not be available at all hospitals for some years. In the meantime the fate of the patient will continue to rest in the hands of the surgeon who first treats him. It is essential therefore that both the novice and the accomplished surgeon have a sound grasp of the diagnostic and therapeutic fundamentals of hand surgery. The material in this book is presented in a clear practical manner by a general surgeon who has successfully practiced hand surgery. The result is an especially useful and rewarding book. Many acute situations in hand surgery are not as complicated as they appear to be whereas other problems can be handled only after much study and experience. Based on his experience with over 7000 general and emergency operations yearly at the Ludwigshafen Surgical Clinic and after years of intensive work in the field of hand surgery, my medical chief Dr H R Mittelbach has taken the time and trouble to write this handbook for general and clinical practice. For the practicing surgeon and especially the resident the most important aspects of the treatment of hand injuries have been presented in a clear concise manner. The didactic excellence of the material, its novel format and the simple yet forceful drawings that obviate lengthy text descriptions enable the reader to become quickly oriented. However the book is more than just a cookbook for quick reference.
