PROBLEMS AND PROSPECTS OF DEVELOPMENT OF HOTEL AND RESTAURANT AND TOURIST INDUSTRY IN THE CONDITIONS OF INTEGRATION PROCESSES Holovnia O., Zakharova T., Lopatiuk R., Melnyk S., Prylutskyi A., Stavska U., Tabenska O., 2022-09-22

The development of the world economy indicates the growth of its integration and integrity through the deepening of specialization and cooperation of countries and business entities. Integration appears as an inevitable objectively determined process that covers most spheres of economic life in the world and takes place according to its own laws, general principles and goals, taking into account the various grounds, conditions and levels of such integration. Today we can observe two mutually exclusive features of integration processes: globalization of the world economy and simultaneous national protectionism, which has gained considerable influence in the last decade. We are observing on the one hand the strengthening of integration processes in the world economy in all spheres of social life; there is a reassessment of the system of risks for the modern state and most importantly we are witnessing an increasing pragmatism of relations between countries, the basis of which is dominated by economic factors. At the same time, significant changes are taking place in the field of hospitality and tourism. The diversification of hospitality and tourism services, the development of the hospitality and tourism industry in new territories and competition in the market require the governments of different countries to reconsider their attitude to the development of this industry and to approach the development of its strategy more seriously. In modern conditions, the governments of many countries pay more attention to the formation of strategies for the development of regions, including strategies for the development of the hospitality and tourism industry. Considering the fact that the field of hospitality has changed significantly in recent years and continues to change, we have seen modern trends in the field of tourism and the hospitality industry, which are definitely relevant. The strategy for the development of the hospitality sector should harmoniously complement the socio-economic strategy of the country and combine the solution of priority socio-economic tasks, increasing the scientific, technical and innovative potential, increasing investment attractiveness and economic stability, improving the quality of life of residents. It should be noted that the first sector of the world economy affected by the global pandemic of COVID-19 is tourism. In the current conditions of the global pandemic, it is obvious that tourism is losing employees and customers due to the impossibility of flights to different countries and the risk of contracting the disease from COVID-19. Nevertheless, even in this situation, you can find a way out: to reorient from outbound tourism to domestic tourism and discover your country from a completely different side. At the same time, the economic consequences of the war in Ukraine are felt all over the world. Russian aggression has put pressure on global commodity prices, exacerbated disruptions in supply chains and fueled inflation in most countries around the world. The world economy will lose a trillion dollars this year alone due to Russia's invasion of Ukraine. The presence of unsolved problems and the contradictions of certain issues, the theoretical and practical significance of researching the management processes of enterprises in the tourism sphere and the hotel and restaurant business determined the choice of the topic of the collective monograph. The topic of the study was chosen, taking into account the importance for the development of the tourism sphere and the hotel and restaurant industry of Ukraine of the processes of unification and integration of enterprises, the formation of new formats and management structures in accordance with the objective requirements of world hospitality standards. The authors offer a monograph that is a summary of scientific searches and achievements regarding the results of research work of the Department of Management of Foreign Economic Activity, Hotel and Restaurant Business and Tourism of the Vinnytsia National Agrarian University on the initiative topic: Problems and prospects of the development of the hotel, restaurant and tourism industry in the conditions of integration processes.

The Sky My Kingdom Hanna Reitsch, 2009-03-30 The memoir of the female aviator who became Hitler s favorite pilot The Sky My Kingdom is the fascinating autobiography of the famous World War II test pilot Hanna Reitsch As the war progressed Reitsch was invited to fly many of Germany s latest and increasingly desperate designs including the rocket propelled Messerschmitt Me 163 Komet and several larger bombers on which she tested various mechanisms for cutting barrage balloon cables After crashing on her fifth Me 163 flight she was badly injured but insisted on writing her report before falling unconscious and spending five months in the hospital Eventually she became Adolf Hitler s favorite pilot Reitsch was one of only two women awarded the Iron Cross First Class during World War II and the only woman awarded the Luftwaffe Combined Pilot and Observer Badge with Diamonds She survived many accidents and was badly injured several times In the last days of the war Reitsch was asked to fly her companion Col Gen Robert Ritter von Greim into Berlin to meet with Hitler The city was already surrounded by Red Army troops who had made significant progress into the downtown area when they arrived landing on a city street and traveling to the Führerbunker The aircraft she used was the justly famous Fieseler Storch already well known for the exploit that rescued Mussolini only adding to the legend of both Reitsch and that aircraft She is said to have overheard Hitler laying out plans for Nazi commanders to join together in mass suicide when it was obvious that the war was over She also hoped to fly out propaganda minister Joseph Goebbels six children who had been staying in the bunker since April 22 with their parents but neither Joseph nor Magda Goebbels would allow it She managed to escape Berlin herself on April 29 by flying out through heavy Russian anti-aircraft fire She was a devoted and idealistic Nazi who adored Adolf Hitler and refused to believe the reports of concentration camps and torture Not until much later would she say that she had been disgusted by what she witnessed in the Third Reich She was held for eighteen months by the American military after the war interrogated and subsequently released ultimately to become a champion glider pilot as gliders were the only craft German citizens were allowed to fly Hers is a story that arguably stands as unique in the great drama of World War II

Places of Pain and Shame William Logan, Keir Reeves, 2008-12-05 Places of Pain and Shame is a cross cultural study of sites that represent painful and or shameful episodes in a national or local community s history and the ways that government agencies heritage professionals and the communities themselves seek to remember commemorate and conserve these cases or conversely choose to forget them Such episodes and locations include massacre and genocide sites places related to prisoners of war civil and political prisons and places of benevolent internment such as leper colonies and lunatic asylums These sites bring shame upon us now for the cruelty and futility of the events that occurred within them and the ideologies they represented They are however increasingly being regarded as heritage sites a far cry from the view of heritage that prevailed a generation ago when we were almost entirely concerned with protecting the great and beautiful creations of the past reflections of the creative genius of humanity rather than the reverse the destructive and cruel side of history Why has this shift occurred and what implications does it have for professionals practicing in the heritage field In what ways is this a difficult heritage to deal with This volume brings together academics and practitioners to explore these questions covering not only some of the practical matters but also the theoretical and conceptual issues and uses case studies of historic places museums and memorials from around the globe including the United States Northern Ireland Poland South Africa China Japan Taiwan Cambodia Indonesia Timor and Australia

British Prisoners of War in First World War Germany Oliver Wilkinson, 2017-04-27 An original investigation dedicated to the captivity experiences of British military servicemen captured by Germany in the First World War

Shattered Past Konrad H. Jarausch, Michael Geyer, 2009-03-24 Broken glass twisted beams piles of debris these are the early memories of the children who grew up amidst the ruins of the Third Reich More than five decades later German youth inhabit manicured suburbs and stroll along prosperous pedestrian malls Shattered Past is a bold reconsideration of the perplexing pattern of Germany s twentieth century history Konrad Jarausch and Michael Geyer explore the staggering gap between the country s role in the terrors of war and its subsequent success as a democracy They argue that the collapse of Communism national reunification and the postmodern shift call for a new reading of the country s turbulent development one that no longer suggests continuity but rupture and conflict Comprising original essays the book begins by reexamining the nationalist socialist and liberal master narratives that have dominated the presentation of German history but are now losing their hold Treated next are major issues of recent debate that suggest how new kinds of German history might be written annihilationist warfare complicity with dictatorship the taming of power the impact of migration the struggle over national identity redefinitions of womanhood and the development of consumption as well as popular culture The concluding chapters reflect on the country s gradual transition from chaos to civility This penetrating study will spark a fresh debate about the meaning of the German past during the last century There is no single master narrative no Weltgeist to be discovered But there is a fascinating story to be told in many different ways

To Cope and To Prevail Ilse-Rose Warg, 2012-11 Using a tradition in German culture called the Stammtisch a group of fictional characters resembling the lower and higher middle classes Dr Warg writes an enjoyable and not so conventional memoir filled with well known and lesser known facts about Germany s history and culture during the turbulent years of the 1930s to the 1950s As the Stammtisch and the actual relatives and friends of a young eyewitness discuss politics and economics the reader learns first hand how people coped with those chaotic times by holding on to their customs Through their eyes we see how Germany s culture survived despite the 12 years of Nazi regime the war with its bombardments evacuation separation of families occupation by armed forces the Cold War and dodging bullets when attempting to cross the Russian border that split Germany into East and West

The Grand Strategy of the Byzantine Empire Edward Luttwak,2009-11 In this book the distinguished writer Edward N Luttwak presents the grand strategy of the eastern Roman empire we know as Byzantine which lasted more than twice as long as the more familiar western Roman empire eight hundred years by the shortest definition This extraordinary endurance is all the more remarkable because the Byzantine empire was favored neither by geography nor by military preponderance Yet it was the western empire that dissolved during the fifth century The Byzantine empire so greatly outlasted its western counterpart because its rulers were able to adapt strategically to diminished circumstances by devising new ways of coping with successive enemies It relied less on military strength and more on persuasion to recruit allies dissuade threatening neighbors and manipulate potential enemies into attacking one another instead Even when the Byzantines fought which they often did with great skill they were less inclined to destroy their enemies than to contain them for they were aware that today s enemies could be tomorrow s allies Born in the fifth century when the formidable threat of Attila s Huns were deflected with a minimum of force Byzantine strategy continued to be refined over the centuries incidentally leaving for us several fascinating guidebooks to statecraft and war The Grand Strategy of the Byzantine Empire is a broad interpretive account of Byzantine strategy intelligence and diplomacy over the course of eight centuries that will appeal to scholars classicists military history buffs and professional soldiers

Progressive Development Arie S. Issar, The book is based on the results of the investigations of the authors in the semi arid and arid regions ASAR of the globe These investigations brought to the conclusion that the warming climate will cause the drying up of the water resources in these regions In this case the principles of Sustainable Development will not be able to avert forthcoming catastrophes These conclusions brought to the compilation of the policy of Progressive Development emphasising investment in the development of new water resources and changing the natural environments while advancing the local populations on the dimension of knowledge by education

Catalogue of Risks Dirk Proske,2008-07-24 Since the German edition of this book the topic of risk has experienced even greater attention not only in the world of science but also in other fields such as economics and politics Therefore many new publications have evolved To keep with the idea of an encyclopedia for the topic of risk this book has been completely reworked Not only are many updated examples included in chapter Risks and disasters but also new chapters have been introduced such as the chapter Indetermination and risk This new chapter was developed since the question Is it possible for risks to be completely eliminated and if not why has become a major point of concern Therefore especially in this chapter the focus of the book has tended from a simple mathematical or engineering point of view to include much broader concepts Here not only aspects of system theory have to be considered but also some general philosophical questions start to influence the considerations of the topic of risk The main goal of this edition however is not only the extension and revision of the book but also the translation into the English language to allow more readers access to the ideas of the book The author deeply hopes that the success the book made in the German edition continues and that readers experience a major gain from reading the book

Is That a Fish in Your Ear? David Bellos, 2011-09 People speak different languages and always have The Ancient Greeks took no notice of anything unless it was said in Greek the Romans made everyone speak Latin and in India people learned their neighbours languages as did many ordinary Europeans in times past But today we all use translation to cope with the diversity of languages Without translation there would be no world news not much of a reading list in any subject at college no repair manuals for cars or planes and we wouldn't even be able to put together flat pack furniture *Is That a Fish in Your Ear* ranges across the whole of human experience from foreign films to philosophy to show why translation is at the heart of what we do and who we are What's the difference between translating unprepared natural speech and translating *Madame Bovary* How do you translate a joke What's the difference between a native tongue and a learned one Can you translate between any pair of languages or only between some What really goes on when world leaders speak at the UN Can machines ever replace human translators and if not why The biggest question is how do we ever really know that we've grasped what anybody else says in our own language or in another Surprising witty and written with great joie de vivre this book is all about us and how we understand each other

Slav Outposts in Central European History Gerald Stone, 2015-12-17 While many think of European history in terms of the major states that today make up the map of Europe this approach tends to overlook submerged nations like the Wends the westernmost Slavs who once inhabited the lands which later became East Germany and Western Poland This book examines the decline and gradual erosion of the Wends from the time when they occupied all the land between the River Elbe and the River Vistula around 800 AD to the present where they still survive in tiny enclaves south of Berlin the Wends and Sorbs and west of Danzig the Kashubs *Slav Outposts in Central European History* which also includes numerous images and maps puts the story of the Wends the Sorbs and the Kashubs in a wider European context in order to further sophisticate our understanding of how ethnic groups societies confessions and states have flourished or floundered in the region It is an important book for all students and scholars of central European history and the history of European peoples and states more generally

Johannes Kepler Wolfgang Osterhage, 2020-05-26 This book traces the development of Kepler's ideas along with his unsteady wanderings in a world dominated by religious turmoil Johannes Kepler like Galileo was a supporter of the Copernican heliocentric world model From an early stage his principal objective was to discover the world behind the world i e to identify the underlying order and the secrets that make the world function as it does the hidden world harmony Kepler was driven both by his religious belief and Greek mysticism which he found in ancient mathematics His urge to find a construct encompassing the harmony of every possible aspect of the world including astronomy geometry and music is seen as a manifestation of a deep human desire to bring order to the apparent chaos surrounding our existence This desire continues to this day as we search for a theory that will finally unify and harmonise the forces of nature
